RE: 2009-2010 NCLB Cons Federal ARRA/Stimulus Grant Funding

ASCISD has received ARRA/Stimulus Grant Funding for the 2009-2010 school year. This funding is being utilized to improve teacher effectiveness in the classroom and the quality of instruction for all students at ASCISD. ASCISD administration has provided teachers with opportunities to secure high quality, focused and sustained professional development using such strategies as mentoring and coaching, that is aligned with each campus' needs and state academic content standards. It has also been utilized to provide extra-duty pay for teachers to attend professional development activities. Grant money is also being used to provide training and subsequent resources (including supplies and materials) to implement training around individualized instructional strategies for students identified as needing intervention.
